

DONA ERIC KOULODJI

Data Scientist, Machine Learning Engineer

Benin, Abomey-Calavi

[Whatsapp](#) [Email](#) [Linkedin](#) [Github](#) [portfolio](#)

PROFILE SUMMARY

A physicist by training, I am passionate about the intersection of mathematical laws and Artificial Intelligence. Experienced in developing AI and ML solutions, I have dedicated my learning and research to data modeling and solving complex and critical challenges in fields such as health, space, and education.

EDUCATION

- University of Abomey-Calavi** Benin
Bachelor of Science in Physics Fundamental (GPA: 12.35/20) Jan 2021 – July 2025
- DataCamp Inc.** Online
Machine Learning Engineer Certification June 2025

SKILLS SUMMARY

- Languages:** Python, SQL, JavaScript, R, Fortran, Bash
- AI/ML:** Scikit-learn, TensorFlow, Keras, NLTK, SpaCy, HuggingFace, RAG, Transformers
- Data & Dev:** PySpark, PostgreSQL, Docker, Kubernetes, FastAPI, Django, Flask, Git, NextJS, ReactJs
- Platforms:** GCP, IBM Cloud, Linux, Streamlit

EXPERIENCE

- Datum Africa** Remote
AI & Data Engineer (Part-time) Sept 2025 – Febr 2026
 - Architecture:** Designed robust database models using UML diagrams for scalable data systems.
 - Pipelines:** Built collection pipelines for African languages (Igbo, Hausa) using PySpark and FastAPI.
- French National Centre for Space Studies (CNES)** Remote
Data Developer (Volunteering) July 2025 – Oct 2025
 - Automation:** Developed automated pipelines ensuring quality for large-scale satellite datasets (more 10Go of data).
 - Optimization:** Processed and optimized spatial data for machine learning applications.
- DSA 2025 Summer School** Nigeria
Presenter & Technical Mentor 2025
 - Forecasting:** Led a project on rice yield prediction using Unsupervised Learning and Time Series.
 - Instruction:** Trained 20 international students on ML concepts and Python implementation.

KEY PROJECTS

- NASA Space Challenge:** Developed a Cloud-based app forecasting air quality by integrating TEMPO satellite data with ground sensors.
- Fake News Detection (NLP):** Built an SVM model achieving **92% accuracy** on 10k datasets. Implementing BERT for performance optimization. (Tech: Scikit-learn, Streamlit, SHAP).
- SanaBenin: Clinical AI Agent for Patient Management:** Developed an Agentic RAG system for the **Ministry of Health** to automate appointment scheduling and medical record management. Implemented a secure vector database to retrieve clinical guidelines, ensuring responses are grounded in verified data. **Tech:** Python, OpenAI/Gemini, Pinecone (Vector DB), LangChain, RAG Architecture, Fine-tuning.

CERTIFICATIONS

- Data Scientist, Machine Learning Certified IBM:** Coursera & IBM
- Data Scientist, Artificial Intelligence:** AfricaTechUpTour (April-September 2024)
- Create RAG Agents with LLMS:** NVIDIA
- Django Developer:** Coursera
- Create Apps LLMs with Prompt Engineering:** NVIDIA

HONORS AND AWARDS

- 3rd Best Innovation Project in Science - September 2024
- Best model for predicting house prices in France (9.6/10) Hackaton - 2024

SOFT SKILLS & HOBBIES

- Team Management, Critical Thinking, Communication, Event Management
- Football, Reading, Travel

LANGUAGES

French : Native **English:** Level B1
